LinkedIn: [linkedin.com/in/joshuadotillos](https://www.linkedin.com/in/joshuadotillos)

Results-driven Software Engineer with 4+ years of experience building and maintaining enterprise web applications for government-scale and insurance platforms. Specializes in C#, .NET, ASP.NET MVC, and SQL Server, with proven expertise in RESTful API design, CMS migration, and CI/CD pipelines via Azure DevOps. Currently delivering secure backend solutions for Singapore's national tax authority (IRAS). Cum Laude graduated with a track record of clean code, stakeholder collaboration, and on-time delivery across cross-functional teams.

WORK EXPERIENCE

Software Engineer

New York Global Consultants Inc. (NYGCI) • Cebu City, Philippines • January 2026 - Present

Tech Stack: C#, .NET, SQL Server, REST API, Postman

- Engineered and maintained backend services for the Inland Revenue Authority of Singapore (IRAS) tax administration platform, supporting millions of taxpayer records.
- Designed and delivered RESTful API endpoints consumed by front-end and third-party integration systems, reducing integration effort for partner teams.
- Optimized SQL queries and database transactions, improving query response times and ensuring data integrity across high-volume operations.
- Conducted thorough API testing and validation using Postman, achieving reliable endpoint behavior prior to every production release.
- Collaborated with developers, testers, and government stakeholders to deliver scalable, regulation-compliant solutions on schedule.

Software Application Developer

Ray Business Technologies • Cebu City, Philippines • October 2022 - October 2025

Tech Stack: ASP.NET MVC, Kentico 12/13, SQL Server, JavaScript, Azure DevOps

- Led end-to-end development and maintenance of the Uni Assurance insurance platform, serving as the primary developer across a 3-year engagement.
- Spearheaded the CMS migration from Kentico 12 to Kentico 13, ensuring zero data loss and minimal downtime during the production cutover.
- Built responsive, WCAG-compliant web pages using HTML, CSS, SCSS, and JavaScript, improving cross-device accessibility for thousands of end users.
- Developed and maintained C# / ASP.NET MVC backend features, reducing reported bugs by 30% through systematic refactoring and SonarLint compliance.
- Created custom Kentico widgets and page components, cutting content-team delivery time for new pages by enabling no-code page assembly.
- Managed source control, branching strategy, and CI/CD pipelines through Azure DevOps, Bitbucket, and Git across multiple concurrent releases.
- Worked directly with clients and business stakeholders to gather requirements, translating feedback into actionable technical specifications.

Associate Developer

Ray Business Technologies • Cebu City, Philippines • March 2022 - July 2022

- Completed intensive Kentico Xperience 13 developer training and contributed to live enterprise CMS projects within weeks of onboarding.
- Assisted senior developers with debugging, feature enhancements, and maintenance tasks for production applications.
- Gained practical experience with C#, .NET, xUnit testing, HTML, CSS, and JavaScript in a professional enterprise environment.

TECHNICAL SKILLS

Primary Languages:	C#, SQL, JavaScript
Frameworks & Platforms:	.NET Core / MVC, ASP.NET MVC, Blazor, Kentico 12/13, Umbraco
Frontend:	HTML, CSS, SCSS / LESS, jQuery, gulp
Databases:	SQL Server (SSMS), MySQL, PostgreSQL
Testing & API:	xUnit, Postman, REST API Design
DevOps & Tools:	Azure DevOps, Git, Bitbucket, GitKraken, Visual Studio, VS Code, IIS, XAMPP
Other Languages:	PHP, C (familiar)

NOTABLE PROJECTS

IRAS Tax Administration Platform | Backend Developer

Built secure, scalable backend services in C# / .NET for Singapore's national tax authority. Delivered RESTful API controllers supporting cross-system data integration, high-volume SQL transaction processing, and rigorous Postman-validated endpoint testing. Operated within strict government compliance standards in a fully cross-functional Agile team.

ZAG Platform (Kentico CMS) | Full Stack Developer

Owned full-stack feature delivery including C# backend logic, Razor (.cshtml) views, SCSS styling, and jQuery interactions. Managed Kentico hotfixes, package upgrades, custom widget creation, and sophisticated Personas configurations. Maintained direct client relationships to rapidly adapt to evolving business requirements.

Uni-Assurance Platform | Full Stack Developer

Drove major code quality initiative - refactored codebase to meet SonarLint standards, reducing technical debt and improving long-term maintainability. Expanded xUnit test coverage, developed front-end enhancements, and managed CI/CD pipelines and repository operations through Azure DevOps.

EDUCATION

Bachelor of Science in Information Technology — Cum Laude

University of San Jose-Recoletos • Cebu City, Philippines • June 2018 - June 2022
